

User interface design

My part of the ETS Connect tutor marketplace project was developing the user interface of the system using React. The design was created based on the wireframes that were prepared earlier, so the pages followed the planned layout and user flow. The main aim was to build a clear and easy interface where students, tutors and admins could navigate through the system smoothly and understand what actions they need to take.

Pages implemented

The design had several pages that covered the main parts of the ETS Connect system and first I created the public and authentication pages, including the home page, About page, Register page, Login page and Forgot Password page. These pages allow users to enter the platform and understand what the system is about and the possible actions they can take. I also developed the main student pages, such as the Student Dashboard, Tutor Search, Tutor Profile, Saved Tutors, Booking Request, Booking Confirmation, Calendar, Reminder Centre, AI Tutor Recommendation, Messages, Feedback Form and Tutor Reviews. These pages support the student navigation from searching for a tutor all through to booking and reviewing a session. For tutors I created pages for the Tutor Dashboard, Manage Availability, Booking Requests and Tutor Verification process. I also included admin and payment pages such as User Management, Booking Payment, Booking verification, Transaction History, Invoice Details and Payment Failed, to be used if the payment was not successful.

Design and layout

The user interface was designed using React Router so users will navigate without reloading the whole site. I used a consistent navbar and footer across the system to reduce confusion and prevent users from getting lost. The design also followed the required colour combination, blue as the main colour, light blue sections, a green accent, white cards, and a light background. Most pages used a card layout with clear buttons, forms, badges and summary sections. I also made the layout responsive for mobile screens and since the full navbar was too wide on smaller devices, I added a mobile sidebar menu to toggle it on and off and make navigation easier.

Feedback Form
Share feedback about your tutoring sessions so the platform can improve tutor quality and student support.

Submit Session Feedback
Rate your tutor and describe your learning experience.

Tutor: Carlos K. Subject: Algebra

Session Date: dd/mm/yyyy Overall Rating: 5 Stars - Excellent

What went well?
The tutor explained the topic clearly and gave examples.

What could be improved?
More practice questions could be added before the next session.

Would you recommend this tutor?
Yes, I would recommend this tutor.

Feedback Guide
Helpful feedback should be honest, respectful, and specific.

Be Clear
Mention what the tutor did well, such as explaining clearly, being patient, or preparing useful examples.

Be Fair
Focus on the actual tutoring session and avoid comments that are not related to the learning experience.

Help Others
Your review can help other students choose a tutor who explains their learning needs.

Reviews for Carlos K.

Emma L.
Algebra Session - 5 Stars
Carlos explained the algebra steps clearly and gave me practice questions that helped me understand the topic better.

Daniel P.
Calculus Session - 5 Stars
The session was well organized. The tutor was patient and helped me work through difficult exam-style questions.

Grace M.
Maths Revision - 4 Stars
Good support and clear explanations. I could like more practice examples in the next session.

Manage Availability
Set your available tutoring days and time slots so students can request sessions that match your schedule.

Weekly Availability
Select the days and times you are available for tutoring.

Monday
Available for entire tutoring 10:00 - 11:30 Action

Tuesday
No available time added

Wednesday
Available for online and hybrid tutoring 10:00 - 11:30 Action

Thursday
No available time added

Friday
Evening tutoring support 17:00 - 20:00 Action

Saturday
Evening tutoring sessions 18:00 - 21:00 Action

Tutor Verification
Upload your identification, qualification, and supporting documents so the admin team can review and verify your tutor profile.

Upload Verification Documents
These documents help confirm your identity and tutoring background.

Identity Document
Upload a passport, driver licence, or student ID. Choose File No file chosen

Qualification Certificate
Upload your degree, certificate, or study record. Choose File No file chosen

Teaching / Tutoring Experience
Upload any document showing your tutoring experience. Choose File No file chosen

Short Verification Note
Briefly explain your tutoring experience and the subjects you can support.

Cancel Submit for Review

Verification Checklist
Make sure your documents are clear before submitting.

Upload a clear identity document.

Upload your qualification or subject proof.

Add a short note about your tutoring experience.

Wait for admin approval before your profile becomes verified.

Current Status
Your tutor profile is not yet fully verified. Once approved, a verified badge will appear on your profile.

How the Interface design supports user tasks

The interface supports the main tasks for each type of user like for students the pages allows them to search and filter tutors, open tutor profiles, save tutors for later and send booking requests, complete the booking flow by viewing confirmation details, verifying the booking, making payments, checking invoices then they can see transaction history after making the payment. The calendar and reminder pages help students keep track of upcoming sessions, while the messages page allows them to communicate directly with tutors and after sessions, they can submit feedback and view tutor reviews after sessions. For tutors the interface provides a dashboard where they can manage their work, update availability, respond to booking requests and submit verification documents. the admins have the dashboard and user management pages where they can review users, manage accounts, and check tutor verification status.
